**Sub: Non implementation of dynamic emission limit for OCMES in Oil Refineries -Reg**

**Ref:** (i) This office Letter No 16228-16241 dated January 10,2018  
(ii) RIL letter dated February 22, 2018

Sir,

This has refer to the above cited subject and letter wherein you have mentioned cyber security issue needs to be ensured .In this regard ,the matter discussed during the meeting on 22.12.2017 at CPCB and displayed one of the petroleum manufacturing industries i.e. M/s ONGC Mangalore Petrochemical Ltd(OMPL), Mangalore, Karnataka. The system was functional and emission limit changes automatically when the fuel changes from liquid to gas and vice versa. The installation/connectivity of 46 flowmeters should not be a reason to implement the dynamic emission in the furnaces/heaters etc.

In view of above you are directed to implement the dynamic limit immediately. Non-compliance of the above direction will lead to levying environmental compensation charges for the period starting from 22.02.2018 till the date of compliance.

Yours faithfully,

(A.Sudhakar)  
Member Secretary
