1. Introduction:

The main causes attributed to the Pollution of River Ganga are due to disposal of industrial and domestic sewage effluent directly by drains or indirectly through tributaries. The storm water drains designated to flood-out the storm water during rainy season, are now being used for disposal of sewage and trade effluents which ultimately joins River Ganga.

These drains exert pollution load into River Ganga in terms of Biochemical Oxygen demand (BOD) and Faecal Coliform Bacteria. There are possibilities that the drains may dispose toxic pollutants like metals and pesticide which they may receive from catchment area.

Therefore, Assessment of Pollution of the drains is essential and in this context CPCB which has presented data on drains before the Hon'ble Tribunal and was further directed on 19.11.2016 for fresh survey and analysis by a committee.

2. The Earlier Report:

The CPCB has placed a report on the drains joining River Ganga which was reviewed by the Hon'ble Tribunal in the hearing held during 19th to 25th October, 2016. CPCB has reported that based on its survey, there were 30 drains joining River Ganga Directly. However, in the report the three drains of Farrukhabad were missed inadvertently, so accordingly to CPCB, the total drains seen physically were 33. Further, UP Jal Nigam has informed more number of drains.

3. Order of Hon'ble Tribunal:

The Hon'ble National Green Tribunal (NGT) in the Order dated 19th October, 2016 directed that the Member Secretary, CPCB, Chief Engineer of U.P. Jal Nigam, Senior most Chief Environmental Officer of U.P. Pollution Control Board and representative from the Ministry of Water Resources shall personally visit the area falling in Segment 'B' of Phase-I. They will identify how many drains join river Ganga or its tributaries and make observations in relation to quantum and quality of effluent that is going to river Ganga or its main tributaries through drains. Let this report be submitted before the next date of hearing.

4. Process of Re-assessment:

In compliance to the Hon'ble Tribunal, CPCB immediately coordinated with Uttar Pradesh Pollution Control Board (UPPCB), the U.P Jal Nigam and National Mission for Clean Ganga (NMCG) and deputed the inspection teams to physically inspect each drain joining River Ganga and its main tributaries, Kali-East and Ramganga. The Member Secretary, CPCB has also crosschecked the drains and the River Kali-East and Ganga. These locations include i.e. Kadrabad Drain (Kali-East), Chhoiya Drain (Kali-East), Fuldehra (Ganga), Ganga (Brij Ghat, Poonth) and Kali East at Hapur.

During the re-assessment of drains, identified drains have been segregated into the following classes;

- A. Drains carrying only storm water/irrigation water
- B. Drains carrying sewage/industrial effluents or mixed effluents
- C. The drains which are Tapped/dry

5. Procedures and Methods for Flow measurement, Sampling and Analysis of Samples

The Central Pollution Control Board (CPCB) collected samples from the drains and followed the Standard Method (American Public Health Association and approved protocols under National Accreditation Board for Laboratories). The samples were preserved for Heavy Metals and Pesticides prior to their instrumental analysis. The Ball float method was adopted for instantaneous flow measurement and accordingly, the flow of drains has been expressed in Million Litre per Day (MLD).

6. Findings:

Based on the re-assessment of drains and as per the directions of the Hon'ble Tribunal, the following are the findings/observations and the conclusion (with suggestions).

7. Drains joining River Ganga:

As per the recently carried out survey (During 25th October- 4th November, 2016 and during 6th – 7th December, 2016) the details of each

drain visited by the joint teams along with sample analysis results and the pictures are given in **Annexure -III to VI**.

7.1 Ganga:

There are 30 drains meeting Ganga directly in this Segment and have been physically seen by the joint inspection teams except 2 drains namely Airforce nalla, Cantt nalla.

Except Bagad River all the other rivers namely Banganga, Malan, Sot and Ishan have not been considered as drains due to its flow and characteristics. In addition, small drains having less than 1.0 MLD flow, measured by both Joint Inspection team and UP Jal Nigam at different occasions have not been considered as drain.

Out of 30 drains, 3 drains were found to be tapped. The details of drains joining river Ganga during the present survey are as under:

Drains Discharging into River Ganga								
Sl. No.	Catchment area	Name of New Drain	Tapped/Partly Tapped/Dry	Standing / Flow	Flow (MLD) [As per Joint inspection]	BOD (mg/l) [As per the joint visit]	Pollution Sources	Remarks
1.	Bijnor	1. Hemraj Drain	X	Flow	91	5	Domestic	Contains raw water of barrage

21.		Daheria/ Dateria Drain	X	Flow	20.40	192	Domestic
22.		Prabhat Nagar drain (near Chandausi Road)	X	Flow	Full of solid waste flow could not be measured And confluence with Katghar railway station drain		Mixed
23.	Bareilly - Aligarh to Kannauj	Deveranaiya Nala (River) (Club)	X	Flow	287	40	Mixed
24.		Chawri Nala (Chodari)	X	Flow	19	26	Domestic
25.		Nakatiya Nala (River)	X	Flow	170	24	Mixed
	Total	25	T-0	F-25	728		

Sub-tributaries were not considered.

7.3 Kali-east:

There are 26 drains meeting Kali-east and joint teams have inspected these drains except Sugar Mill nalla in Katauli. Out of these 26 drains, 3 found to be dry.

The details of drains joining river Kali-east as presented earlier and during the present survey are as under:

Drains Discharged into River Kali-east								
Sl. No.	Catchment area	Name of New Drain	Tapp ed /Dry	Standing /Flow	Flow (MLD) as per Joint inspection	BOD (mg/l) As per the joint visit	Pollution Sources	Remarks

	Total	26	3 D	23 F	996			

7.4 River Pandu:

Five drains discharging into River Pandu in the Kanpur region have also been inspected by the joint teams. The details are as follows;

Drains Discharged into Pandu River							
Sl. N o.	Catchment area	Name of New Drain	Tapped/Partly Tapped/ /Dry	Standing/ Flow	Flow (MLD) as per Joint inspection	BOD (mg/l) As per the joint visit	Pollution Sources
1.	Kanpur	Panki Nala (Thermal power)	X	Flow	74.17	14	Mixed
2.		ICI Nala	X	Flow	19	43	Mixed
3.		Ganda Nala	Partly tapped	Flow	136.81	67	Domestic
4.		COD Nala	X	Flow	78.62	55	Mixed
5.		Halwa Khand Nala	Diverted to COD drain, however overflow goes to Pandu	Flow	40.49	82	Domestic
	Total	5	PT 1	F 5	349		

PT- Partly Tapped, F- Flow,

8. Observations:

- a. It has been observed there are 30 drains joining River Ganga between Haridwar to Kanpur down (Unnao) directly, 3 drains are tapped, 4 drains are partly tapped and 1 is found to be dry or being used for irrigation.
- b. There are 25 numbers of drains joining River Ramganga. Due to solid waste dumping; flow of the 4 drains could not be measured.
- c. There are 26 drains joining River Kali-East directly, out of which 3 drains found to be dry.
- d. There are 5 drains joining river Pandu, 1 drain is partly tapped.
- e. It has been observed that River Ganga is receiving 3048MLD waste water including River Banganga. However, from the 30 drains 701 MLD of waste water is being discharged into River Ganga directly.
- f. Except 3 drains (Hemraj, Garh and Bargariya Ghat) all the other drains joining directly into River Ganga indicate presence of pesticides.
- g. Four drains of Kanpur carrying high concentration of Chromium ranging from 2 mg/l to 84 mg/l.
- h. Arsenic was found above permissible limits of drinking water in one drain (Garh), Cadmium in one drain (Wazidpur Nalla), Lead was also found in five drains.

9. Suggestions (proposed):

- a. All the drains should have flow measuring system before they join River Ganga.
- b. The custodians of the drains should clean the drains regularly and filthy material should be disposed off properly.
- c. Effluent characteristics should be monitored on monthly basis.
- d. An intermediate method should be adopted for treating sewage and industrial effluents flowing in the drains.
- e. Wherever possible and as per the availability of land, sewage treatment plants should be set up and the treated effluents should meet the norms (BOD<10 mg/l and Faecal Coliform Bacteria < 230 MPN).
- f. Treated effluent, as far as possible and feasible, can be used for industrial and non-potable purposes.
- g. Treated water can also be used for sprinkling on dusty roads and for growing grass to suppress dust emissions.
- h. Treated sewage effluents (free from metals and pesticides) can be used for aquaculture (Fish culture).

Annexures

I. Summary Statement of Drains

(Drains in Segment -B Phase-I, Haridwar D/S to Kanpur D/S)

Pollution Sources	River							
	Ganga		Ramganga		Kali East		Pandu River

Total			00	05			349	145	

10. Possible Reasons of difference of discharge:

- a. The ball float method has been adopted for instantaneous flow measurements of drains by joint inspection team. It may be more due to measurement at peak hours. While, average flow is generally measured by U.P. Jal Nigam based on hourly measurements through V-notch/rectangular weir.
- b. Joint inspection teams have measured the discharges before confluence Point of Ganga river or its main tributaries, while U.P Jal Nigam has measured discharges within the municipal limits of the town. There are other drains or sub-tributaries meeting outside the town.

11. Comments of UP Jal Nigam:

- a. Every drain, contributing pollution within the municipal area of the town, is important and worth considering from the point of interception & diversion, as far as it meets river Ganga or its any of the tributaries.
- b. Average flow is generally based on hourly measurements through V notch/ rectangular wier. In Meerut, Bulandshahr and Rampur, average flow is based on float method.
- c. Discharge of 14 drains of Moradabad (sl. 6, 7, 13 to 24) were measured in year 2011 at the time of preparation of sewerage project for zone-I. Discharge of all other drains were measured in year 2015
- d. Move to page after pandu river

III. Data Sheet of Drains Joining River Ganga.

DRAIN MONITORING FORMAT
(Ganga)

Date & Time of sampling: 26.10.2016, 10:30 AM onwards

1.	Name of the Drain	:	Banganga
2.	Meeting Ganga	:	Left bank
3.	Name of the Regional Office of SPCB	:	Muzaffarnagar
4.	Source of pollution load:	:	Domestic
5.	If Industrial /Mixed (Please indicate type of sector)	:	NA
6.	Traceable length of drain (in Km) before meeting Ganga (through google earth/map)	:	Approx. 40-50 km
7.	Catchment area	:	Sukratal
8.	Co-ordinate of the confluence point (if not reachable indirect through google earth/map) (Decimal units)	Latitude	: 29°25'26.07"N
		Longitude	: 78° 1'5.05"E
	Distance from confluence point (may the find out over google earth/map), KM		Approx. 5-7km
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	: 29°29'29.3"N
		Longitude	: 77°59'24.2"E
10.	Landmarks / Address of the Location		Sukratal Bridge, confluence point between Solani and Banganga river
11.	Flow if in MLD, if zero indicate whether dry or stagnant	:	2346.53
12.	Observations	:	Banganga comes from Laksar, Haridwar, Uttarakhand.
13.	Name of all monitoring officers along with Designation		Dr. Pankaj Kumar, Scientist 'D', CPCB Dr. M. Jiban Singh, Research Associate, CPCB Sh. Neeraj Gahlawat, Project Office, NMCG Sh. A.K. Tewari, Regional Officer, Bijnor/ Muzaffarnagar, UPPCB Sh. Rajiv Tyagi, Executive Engineer, UPJN Sh. R. K. Singh, AE, UPJN

Sampling point

Confluence point with Ganga River

DRAIN MONITORING FORM
(Ganga)

Date & Time of sampling: 26.10.2016 (13.00hrs)

1.	Name of the Drain		:	Chhoiya Drain
2.	Meeting Ganga/Ramganga/Kali-east at -		:	meets Ganga at left bank
3.	Name of the Regional Office of SPCB		:	SPCB, Bijnor
4.	Source of pollution load:		:	(Domestic/Industrial/Mixed)- Mixed
5.	If Industrial /Mixed (Please indicate type of sector)		:	Mixed (domestic and industrial, mainly distillery and paper industries)
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)		:	-----
7.	Catchment area		:	Bijnor
8.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	:	29°05'49.6"N
		Longitude	:	078°05'49.6"E
	Distance from confluence point (may the find out over google earth/map), KM		:	Sample taken near confluence point (at nearly 50 meter before confluence)
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	:	29005' 49.6" N
		Longitude	:	078005'49.6"E
10.	Landmarks / Address of the Location		:	Near Rasulpur bhawan village, Datiyata Road, Khanpur
11.	Flow (if in MLD) if zero indicate whether dry or stagnant		:	Due to back flow of river, flow could not be measured (As per previous Inspection report, dated 04.10.2016, the flow was 137.8 MLD however, considering submerged flow a factor 0.5 has been applied)
12.	Observations		:	<ul style="list-style-type: none"> ❖ There was high back flow of river into the drain. ❖ The water was visibly found slightly black. ❖ Reaching confluence point was found very difficult.
13.	Urgent action required, if any		:	---

DRAIN MONITORING FORMAT
(Ganga)

Date & Time of sampling: 02.11.2016 (13.00hrs)

1.	Name of the Drain		:	Bagad River (drain)
2.	Meeting Ganga/Ramganga/Kali-east at -		:	Does not meet Ganga, remains dry after nearly 20 Km from Gajraula.
3.	Name of the Regional Office of SPCB		:	Bijnor
4.	Source of pollution load:		:	Industrial
5.	If Industrial /Mixed (Please indicate type of sector)		:	Industrial (Silica, Pharma and Paper industries etc.)
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)		:	Does not meet Ganga as it remains dry after nearly 15 KM from Gajraula
7.	Catchment area		:	Gajraula
8.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	:	
		Longitude	:	-
	Distance from confluence point (may the find out over google earth/map), KM		:	-
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	:	28° 48' 23.90"N 078°12'59.8"E
		Longitude	:	
10.	Landmarks / Address of the Location		:	Near Jubilant industry in Gajraula, sampling point near to highway over bridge
11.	Flow in MLD, if zero indicate whether dry or stagnant		:	flow could not be measured due to stagnant water
12.	Observations		:	The water in the drain was found carrying industrial effluents. As per the information provided by the State officials, it originates near Dadiyal in Amroha district and after travelling to nearly 20 KM from Gajraula, it becomes dry.
13.	Urgent action required, if any		:	----

Photographs with captions – Sampling & Confluence point (Add date & Time stamping in camera)	
 A photograph showing a narrow, shallow stream flowing through a grassy area. The water is dark and appears to be flowing from a nearby drain or pipe. There are some debris and trash visible in the water.	Sampling Point of Bhunighat drain
 A photograph showing a long, narrow, rectangular depression in the ground, likely a dry riverbed or a drainage channel. The bottom of the depression is filled with dark, stagnant wastewater. The surrounding area is dry and appears to be a mix of soil and sparse vegetation.	Wastewater logged at River bed of Ganga

DRAIN MONITORING FORMAT
(Ganga)

Date & Time of sampling: 08.12.16 & 10:30 a.m

1.	Name of the Drain		:	Gudara ghat, Bithoor (Durudwara)
2.	Meeting Ganga/Ramganga/Kali-east at -		:	Meet to River Ganga at Right bank
3.	Name of the Regional Office of SPCB		:	UPPCB Kanpur Nagar
4.	Source of pollution load:		:	(Domestic)
5.	If Industrial /Mixed (name of the units & sector) and details may be obtained confirmed from the regional officers of SPCB		:	-NA-
6.	Traceable length (in Km) before meeting Ganga River (through google earth/map)		:	Approx.50 m
7.	Catchment area		:	Azimula nagar etc.
8.	Co-ordinate of the confluence point (if not reachable indirect through google earth/map) (Decimal units)(River Bed)	Latitude	:	N 26°36'41"
		Longitude	:	E 80°16'30"

DRAIN MONITORING FORMAT
(Ganga)

Date & Time of sampling: 25-10-2016 at 4:55 pm

1.	Name of the Drain	:	Ranighat Nalla, Kanpur
2.	Meeting Ganga at -	:	Right bank
3.	Name of the Regional Office of SPCB	:	Kanpur UPPCB
4.	Source of pollution load:	:	Domestic
5.	If Industrial /Mixed (name of the units & sector) and details may be obtained confirmed from the regional officers of SPCB	:	N.A
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)	:	Approx. 2.17 Km
7.	Catchment area	:	Kanpur City
8.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	: N 26° 29' 36.4302"
		Longitude	E 80° 19' 44.0004"
	Distance from confluence point (may the find out over google earth/map), KM		Approx. 25 m
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	: N 26° 29' 35.88"
		Longitude	E 80° 19' 43.392"
10.	Landmarks / Address of the Location		New Raw water Pumping station (Canal) Ranighat
11.	Flow (if in MLD) if zero indicate whether dry or stagnant	:	1.39 MLD
12.	Observations	:	Nala is Tapped and still sewage meeting to the River Ganga.
13.	Name of all monitoring officers along with Designation		1. 1.Sh. R.B. Singh, Sci. C, CPCB ZO Lucknow 2.Sh. Rajesh Kumar, RA-1, CPCB ZO Lucknow 3.Sh. Shantu Sonkar, JEE, UPPCB, Kanpur 4. Sh. A.K. Trivedi, AEE, J.N. Kanpur

DRAIN MONITORING FORMAT
(Ganga)

Date & Time of sampling: 24.10.2016

1.	Name of Drain		:	Sisamau Nalla, Jajmau Kanpur						
2.	Confluence with Ganga		Right bank Ganga							
3.	Name of the Regional Office of SPCB		RO Kanpur UPPCB							
4.	Source of Pollution Load		Mixed (Mostly sewage)							
5.	If Industrial /Mixed (Please indicate type of sector)		Some quantity of untreated wastewater from slaughter houses at Fazalganj is discharged into the Sisamau drain							
6.	Traceable length of drain (in Km) before meeting Ganga (through Google earth/ map)		Around 7-8 Km							
7.	Catchment area		Kanpur City							
8.	Co-ordinate of the confluence point (if not reachable indirect though Google earth/ map) (Decimal units)	Latitude		26°29'29.26"N						
		Longitude		80°19'59.68"E						
	Distance from confluence point (may the find out over Google earth/map), Km		500 m							
9.	Co-ordinate of the sampling point (decimal units)	Latitude		26°29'23"N						
		Longitude		80°19'53.74"E						
10.	Landmarks/ Address of the location		Inside the power plant							
11.	Flow in MLD, if Zero indicate whether dry or stagnant		With 0.65 factor for Averaging of surface Velocity and drain cross section profile the flow is 130 MLD							
12.	Observations	01.The Sisamau drain is mostly carrying city sewage but some quantity of wastewater from slaughter houses located at Fazalganj is also mixed into the drain. 02.The untreated sewage is discharged directly into the river Ganga without any treatment.								
13. DRAIN MONITORING FORMAT
(Ganga)

Date & Time of sampling: 24.10.2016

1.	Name of Drain		:	Sheetlabazar Drain, Jajmau Kanpur	
2.	Confluence with R. Ganga			Right bank	
3.	Name of the Regional Office of SPCB			RO Kanpur UPPCB	
4.	Source of Pollution Load			Mixed (Sewage + Tannery Wastewater)	
5.	IF Industrial/ Mixed (Name of the units & sector) and details may be obtained confirmed from the regional officers of SPCB			Around 400 tannery units located in Jajmau cluster.	
6.	Traceable length (in Km) before meeting Ganga (through Google earth/ map)			Around 01 Km	
7.	Catchment area			Jamau industrial cluster	
8.	Co-ordinate of the confluence point (if not reachable indirect though Google earth/ map) (Decimal units)	Latitude Longitude		26°26'13"N	
				80°24'13"E	
	Distance from confluence point (may the find out over Google earth/map), Km			Approx. 10 m	
9.	Co-ordinate of the sampling point (decimal units)	Latitude Longitude		26°26'13"N	
				80°24'13"E	
10.	Landmarks/ Address of the location			Confined path made by wastewater into the river Ganga.	
11.	Flow (if in MLD) if Zero indicate whether dry or stagnant			With 0.65 factor for Averaging of surface Velocity and drain cross section profile the flow is 15.6 MLD	
12.	Characteristics	Colour		Black	
		pH		8.09	
		TSS		887

**DRAIN MONITORING FORMA
(Ganga)**

Date & Time of sampling: 06/12/2016, 5:00 PM

1.	Name of the Drain	:	Railway Bridge Drain
2.	Meeting Ganga at -	:	Left bank (On the day of monitoring drain was not meeting R. Ganga)
3.	Name of the Regional Office of SPCB	:	UPPCB, RO, Unnao
4.	Source of pollution load:	:	Domestic
5.	If Industrial /Mixed (name of the units & sector) and details may be obtained confirmed from the regional officers of SPCB	:	NA
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)	:	~2 KM
7.	Catchment area	:	Mishra Colony, Sita Ram Colony, Paschim Ganga Ghat
8.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	:
		Longitude	- -
	Distance from confluence point (may the find out over google earth/map), KM		- (On the day of monitoring drain was not meeting R. Ganga)
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	:
		Longitude	E 80°22.656'
10.	Landmarks / Address of the Location	:	Below Railway (Old Bridge), Shuklaganj, Unnao
11.	Flow (if in MLD) if zero indicate whether dry or stagnant	:	Flow measurement was not feasible. <i>*As reported by UP Jal Nigam, its discharge was 0.51 MLD (measured by V-notch during June 14-19, 2015).</i>
12.	Observations	:	1. Flow measurement was not possible by float method. 2. Multiple small drains originating from nearby houses make a common drain, which is meets R. Ganga at left bank. 3. Major part of the drain is covered. 4. The drain becomes open near the left bank of R. Ganga in a very irregular shape.

			Therefore, measurement of length, width and depth of drain was not feasible. 5. Too small drain to monitor regularly. 6. On the day of monitoring the drain was not meeting R. Ganga. 7. The wastewater was getting stored in a small pond like structure in the river bed, approximately 150-200 meters away from the left bank of stream of R. Ganga.
13.	Name of all monitoring officers along with Designation		1. Dr. Sanjay Kumar Singh, RA-I, CPCB, ZO(N), Lucknow 2. Dr. Vijya Singh, RA-I, CPCB, ZO(N), Lucknow 3. Mr. Vishal Maurya, Lab Asst., UPPCB, RO, Unnao 4. Mr. Asif Khan, JE, UP Jal Nigam, Unnao

DRAIN MONITORING FORMAT
(Ramganga)

Date & Time of sampling: 02.11.2016 (17.00hrs)

1.	Name of the Drain		:	Nohra drain (Nasiya drain)	
2.	Meeting Ganga/Ramganga/Kali-east at -		:	Drain meets Ramganga at left bank	
3.	Name of the Regional Office of SPCB		:	SPCB, Bijnor	
4.	Source of pollution load:		:	(Domestic/Industrial/Mixed)- Mixed	
5.	If Industrial /Mixed		:	Mixed (but carries mostly domestic waste)	
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)		:	-	
7.	Catchment area		:	Dhampur and Bijnor	
8.	Co-ordinate of the confluence point (if not reachable indirect through google earth/map) (Decimal units)	Latitude	:	29°07'13.4"N	
		Longitude	:	078°40'0.81"E	
	Distance from confluence point (may the find out over google earth/map), KM		:	3 Km (approx.)	
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	:	29°06'15.5" N	
		Longitude	:	078°38'52.4" E	
10.	Landmarks / Address of the Location		:	Confluence point near Fazlabad and Rahimabad villages in chajlaut block in Moradabad District.	
11.	Flow (if in MLD) if zero indicate whether dry or stagnant		:	14.52	
12.	Observations		:	Since flow measurement and sampling was not possible at confluence point, it was done at nearly 3 Km away from the confluence point. Reaching confluence point was difficult. Confluence point falls under Moradabad district. However, drain flows mainly through Bijnor region carrying pollution from Bijnor region. Hence, it was requested by AEE, UPPCB, Moradabad to monitor the same by Bijnor SPCB officials.	
13.	Urgent action required, if any		:	----	
14.	Name of all monitoring officers along with Designation		:	1. Dr Brajesh Shrivastava, Sc 'C', CPCB 2.Ms. Anshul Kumari, R.A., CPCB 3. Shri Vijay, AEE , UPPCB, Moradabad	

		4. Shri Rajeev Shrivastava A.S.O UPPCB Bijnor 5. Shri Anjani, UPPCB 6. Shri Vimal Kumar Rajpoot, S. A., UPPCB 7. Shri Bhramhanand A.E., U.P. Jal Nigam. 8. Shri Amit, Research Officer, NMCG

DRAIN MONITORING FORMAT
(Ramganga)

Date & Time of sampling: 04.11.2016 (14.00hrs)

1.	Name of the Drain		:	Rampur Drain
2.	Meeting Ganga/Ramganga/Kali-east at -		:	It meets Kosi first at left bank as seen during the visit, then confluences finally in Ramganga
3.	Name of the Regional Office of SPCB		:	SPCB, Moradabad
4.	Source of pollution load:		:	(Domestic/Industrial/Mixed)- Mixed (mostly domestic)
5.	If Industrial /Mixed		:	Mixed (carries mainly domestic waste)
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)		:	From origin (i.e. Rampur drain) to confluence point (i.e. meeting at Kosi river), the distance is nearly 30 Km as per available information
7.	Catchment area		:	Rampur
8.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	:	28°38'56.6"N
		Longitude	:	079°01'06.9" E
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	:	28°38'56.6"N
		Longitude	:	079°01'06.9" E
10.	Landmarks / Address of the Location		:	---
11.	Flow (if in MLD) if zero indicate whether dry or stagnant		:	34.31
12.	Observations		:	As informed by the officials from the State, due to change of river course, it now meets Kosi river. From there-onwards, the final discharge is in Ramganaga
13.	Urgent action required, if any		:	-----
14.	Name of all monitoring officers along with Designation		:	1. Dr Brajesh Shrivastava, Sc 'C', CPCB 2. Shri Ajay Kumar, MTS, CPCB 4. Shri Vimal Kumar Rajpoot, S. A., UPPCB 5. Shri U. C. Shukla, A.E., U.P. Jal Nigam. 6. Shri Praveen Kutt, Project Manager, U.P. Jal Nigam 7. Shri Neeraj Gahlawat, Project Officer, NMCG

Nawabpura drain-2, about 50 metres before confluence in Ramganga

Nawabpura drain-2, sample showing presence of animals waste (dung)

DRAIN MONITORING FORMAT
(Ramganga)

Date & Time of sampling: 06.12.2016 (1:30 pm)

1.	Name of the Drain	:	Vivekanand Hospital-Left, Moradabad
2.	Meeting Ganga/Ramganga/kali-east at	:	Left bank Ramganga
3.	Name of the Regional Office of SPCB	:	MBD UP
4.	Source of pollution load:	:	Domestic-Sewage
5.	If Industrial /Mixed (Please indicated industrial sector)	:	N.A
6.	Traceable length of drain (in Km) before meeting Kali-east (through google earth/map)	:	Approx. 2 Km
7.	Catchment area	:	Local Colony
8.	Co-ordinate of the confluence point (if not reachable indirect through google earth/map) (Decimal units)	Latitude	28.8875
		Longitude	78.7350
	Distance from confluence point (may the find out over google earth/map), KM		50 Meters approx..
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	28.8875
		Longitude	78.7350
10.	Landmarks / Address of the Location		Baldev Agrawal Natwarapthy
11.	Flow (if in MLD) if zero indicate whether dry or stagnant	:	0.114 MLD
12.	Observations	:	Negligible flow of sewage draining in river. Sewage channel, full of lebris.
13.	Urgent action required, if any	:	May be connected with adjacent road side drain
14.	Name of all monitoring officers along with Designation		1. A. K. Kansal, A.E UPJN 2. Mr. C.B. Chourasia, Sc 'E', CPCB 3. Ms. Shraddha Lonarkar, RA-1 4. Mr. P.P. Singh, JE, UPPCB, MBD 5. Mr. Bipin kandpal, SA, UPPCB, MBD 6. Mohd. Aham, JE

DRAIN MONITORING FORMAT
(Ramganga)

Date & Time of sampling: 06-12-2016 at 2.35 pm

1.	Name of the Drain		:	Jama Masjid (Right) Drain
2.	Please indicate serial number or ID if, name of the drain is appearing in the given list else mentioned "new"		:	New
3.	Meeting Ganga/Ramganga/Kali-east at -		:	Left bank
4.	Name of the Regional Office of SPCB		:	Moradabad
5.	Source of pollution load:		:	Domestic
6.	If Industrial /Mixed (name of the units & sector) and details may be obtained confirmed from the regional officers of SPCB		:	
7.	Traceable length (in Km) before meeting Ganga (through google earth/map)		:	1.0 km (Meets Ramganga)
8.	Catchment area		:	Parts of Moradabad
9.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	:	28°49'48.0957"
		Longitude	:	78°48'37.282"
10	Co-ordinate of the sampling point (Decimal units)	Latitude	:	28°49'48.0957"
		Longitude	:	78°48'37.282"
11	Landmarks / Address of the Location		:	Near Jama Masjid, Under bridge
12	Flow (if in MLD) if zero indicate whether dry or stagnant		:	Not measurable
13	Observations		:	The concrete channel terminates into a water logged area filled with solid wastes. From there, a small channel leads to the river. Buffalo business was flourishing on the bank of the river.
14	Urgent action required, if any		:	Dumping of solid wastes should be immediately checked. Tapping of the drain and treatment through STP may be considered.
15	Name of all monitoring officers along with Designation		:	1. Dr. Sarvesh Rai, Sc. "C", CPCB 2. Dr. Sananda Sinha, RA-I, CPCB 3. Mr. P. C. Sharma, P.E., U.P. Jal Nigam 4. Dr. U. C. Shukla, ASO, RO, Moradabad 5. Mr. Akash Joshi, Lab. Assnt., RO, Moradabad

DRAIN MONITORING FORMAT
(Ramganga)

Date & Time of sampling: 06-12-2016 at 12.00 noon

1.	Name of the Drain	:	Prabhat Nagar Drain
2.	Meeting Ganga/Ramganga/Kali-east at -	:	Left bank Ramganga
3.	Name of the Regional Office of SPCB	:	Moradabad
4.	Source of pollution load:	:	Mixed
5.	If Industrial /Mixed (name of the units & sector) and details may be obtained confirmed from the regional officers of SPCB	:	Electroplating
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)	:	
7.	Catchment area	:	Parts of Moradabad
8.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude Longitude	:
	Distance from confluence point (may the find out over google earth/map), KM		
9.	Co-ordinate of the sampling point (Decimal units)	Latitude Longitude	:
10.	Landmarks / Address of the Location	:	Lohia Impex Manf. & Exports
11.	Flow (if in MLD) if zero indicate whether dry or stagnant	:	Full of solid waste flow could not be measured
12.	Observations	:	As informed by the UP Jal Nigam officers- the drain confluences with Katghar railway station drain.
13.	Urgent action required, if any	:	
14.	Name of all monitoring officers along with Designation	:	1. Dr. Sarvesh Rai, Sc. "C", CPCB 2. Dr. Sananda Sinha, RA-I, CPCB 3. Mr. P. C. Sharma, P.E., U.P. Jal Nigam 4. Dr. U. C. Shukla, ASO, RO, Moradabad 5. Mr. Akash Joshi, Lab. Assnt., RO, Moradabad

The drain was again visted by UPPCB and Jal Nigam on 14.12.2016.

Confluence point of Abu Nalla-2 Drain and Kali East River	Water withdrawn for irrigation from Abu Nalla-2
---	---

DRAIN MONITORING FORMAT
(Kali East)

Date & Time of sampling: 03-11-2016 at 12:00 hrs.

1.	Name of the Drain	:	Odean Nallah (Slaughter House Drain)
2.	Meeting Kali Eeast at -	:	Kali East at Right bank
3.	Name of the Regional Office of SPCB	:	Meerut/UPPCB
4.	Source of pollution load:	:	Mixed
5.	If Industrial /Mixed	:	Illegal Slaughtering
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)	:	-
7.	Catchment area	:	Meerut city
8.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	: 28°55'35.35" N
		Longitude	: 77°45'23.00" E
	Distance from confluence point (may the find out over google earth/map), KM		1.5 km
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	: 28°55'56.8861" N
		Longitude	: 77°44'59.4781" E
10.	Landmarks / Address of the Location		
11.	Flow (if in MLD) if zero indicate whether dry or stagnant	:	174.95
12.	Observations	:	Adjacent farmlands are being irrigated by the drain water.
13.	Name of all monitoring officers along with Designation		1. Dr. Sarvesh Rai, Sc. 'C', CPCB 2. Ms. Garima Dublish, RA-I, CPCB 3. Mr. Munna Singh, Ex En, UP Jal Nigam 4. Mr. Ankit Singh, AEE, RO, UPPCB Meerut 5. Mr. Shravan Kota, Research Officer, NMCG

Sample collecting point in drain	Confluence point in kali -east

DRAIN MONITORING FORMAT
(Kali East)

Date & Time of sampling: 08.11.2016

1	Name of the Drain		:	Neem Nala (Jahagirabad Drain -1 & 2 and Dibai drain- 1, 2 & 3)
2	Meeting River Kali		:	Left bank
3	Name of the Regional Office of SPCB		:	Buland Shahar & Aligarh
4	Source of pollution load:		:	Domestic
5	If Industrial /Mixed (Please indicate type of sector)		:	NA
7	Catchment area		:	Buland Shahar, Aligarh & Kasganj
8	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	:	27°48'29.92"N
		Longitude		78°32'27.12"E
	Distance from confluence point (may the find out over google earth/map), KM			
9	Co-ordinate of the sampling point (Decimal units)	Latitude	:	
		Longitude		
10	Landmarks / Address of the Location		:	
11	Flow if in MLD (Approx)		:	Dry
12	Observations		:	Jahagirabad drain 1 & 2 mixes with Neem nullah and moves towards Dibai town where Dibai Drain 1, 2 & 3 mixes in it and further move towards Gangiri, Kasganj. At Malahpur village towards Ramghat Road it has some water but up to reaching River Kali it becomes fully dry. All these five drains namely Jahangirabad drain 1&2 and Dibai drain 1,2 &3 finally goes to Neem nullah and becomes dry before reaching to River Kali. It should be consider as one major drain may be include in list.

Confluence Point

DRAIN MONITORING FORMAT
(Kali East)

Date & Time of sampling: 02.11.2016 & 2 .57 p.m.

1.	Name of the Drain		:	Kasgnaj Drain Kasganj(Amapur Bus stand – Amapur Road, Kasganj)
2.	Meeting Kali		:	Left bank
3.	Name of the Regional Office of SPCB		:	Regional Office, U.P. Pollution Control Board, Aligarh
4.	Source of pollution load:		:	Domestic
5.	If Industrial /Mixed (name of the units & sector) and details may be obtained confirmed from the regional officers of SPCB		:	NA
6.	Traceable length (in Km) before meeting Ganga (through google earth/map)		:	Approx. 3-4 k.m.
7.	Catchment area		:	Amapur; Amapur Kasganj area
8.	Co-ordinate of the confluence point (if not reachable indirect though google earth/map) (Decimal units)	Latitude	:	27 ° 72' 96" N
		Longitude	:	78 °70' 86" E
	Distance from confluence point (may the find out over google earth/map), KM		:	500 m.
9.	Co-ordinate of the sampling point (Decimal units)	Latitude	:	27 ° 47' 45" N
		Longitude	:	78 °39' 8" E
10.	Landmarks / Address of the Location		:	Amapur Road pulia, Kasganj (2 k.m distance from Amapur)
11.	Flow (if in MLD) if zero indicate whether dry or stagnant		:	09 MLD
12.	Observations		:	The drain is directly fall in river Kali without treatment at 500 m from sampling point near Amapur village in Kasganj and flow was measured 09 MLD.
13.	Name of all monitoring officers along with Designation		:	5. Dr. Ravi Prakash Mishra, RA-I, CPCB, ZO(N) Lucknow. 6. Mr.Arvind Kumar, SRF, CPCB, ZO(N)) Lucknow. 7. Dr. J P Singh, ASO, UPPCB, Aligarh 8. Er. Khalid Ahamad Project Manager Yamuna Pollution Control Unit, UP Jal Nigam, Agra. 9. Er.A K Singh , Junior Engineer , UP Jal Nigam, Agra.
