Salient Features of the E-Waste (Management) Rules, 2016 and its likely implication

E-Waste (Management & Handling) Rules, 2011	E-Waste (Management) Rules, 2016	Reasons /and Likely implications
Title	·	1
e-waste (Management & Handling) Rules, 2011	E-Waste (Management) Rules, 2016	
Applicability		
Producer, consumer or bulk consumer, collection centre, dismantler and recycler	, ,	To address leakage of e-waste to informal sector at all the stages of channelization.
Only to Electrical and Electronic Equipment (EEE) as listed in Schedule I	Extended to components, consumables, spares and parts to EEE in addition to equipment as listed in Schedule I	Bulk of e-waste comprises of components, consumables, spares and parts of EEE which were not getting addressed in previous rules entailing to the scope of their channelization to informal sector.
	Compact Fluorescent Lamp (CFL) and other mercury containing lamp brought under the purview of rules.	Taking into account the lack of any regulation for management of CFL and other mercury containing lamp, CFL has been included in Schedule I which provide the list of EEE to which this rules is applicable.
Exemption		
Micro and Small industry sector as defined in Micro Small and Medium Development Act, 2006		Exemption Continues for micro enterprises, however small enterprises, which have been referred as one of the major source of generation of e-waste, have been included in the rules for responsibility as manufacturer, without burdening them with EPR responsibility as applicable to Producers.

E-Waste (Management & Handling) Rules, 2011	E-Waste (Management) Rules, 2016	Reasons /and Likely implications				
Collection Mechanism						
Collection Centers can be set up by producer or by any person or agency or association for the purpose of collecting e-waste.	Collection is now exclusively Producer's responsibility, which can set up collection centre or point or even can arrange buy back mechanism for such collection.	collection centres which were not necessitate				
Separate authorization from SPCBs for setting up of such collection centres was necessary.	be required, which will be indicated in the EPR Plan of Producers.	Shift from collection centre to collection mechanism approach and removal of need of separate authorization will ensure effective collection simultaneously ensuring flexibility for Producers for implementation. This will check leakage of flow of e-waste to unauthorized players.				
Extended Producer Responsibility (EP	R)					
The Producers are required to obtain required to obtain authorization from SPCBs/PCCs for implementing their	Single EPR Authorization for Producers is now being made CPCB's responsibility to ensure pan India implementation.	Need for separate EPR authorization from each state lead to significant delays and thus failure in implementation of EPR				
Extended Producer Responsibility for effective channelization of E-waste to the registered dismantlers/recyclers	Procedure for seeking the authorization and for effective implementation has now been elaborated with various kind of flexibilities provisions	There had been significant lack of initiatives from Producers wrt implementation of EPR and for capacity building and awareness initiatives though mandated in the rules due to lack of elaborate procedure for the same in the rules which has now been elaborated step-wise.				
Flexibility for ease of implementation of	of EPR					
No Provisions	Option has been given for setting up of PRO, e-waste exchange, e-retailer, Deposit Refund Scheme as additional channel for implementation of EPR by Producers to ensure efficient channelization of e-waste;	These are various non-mandatory options for ease of implementation of EPR

E-Waste (Management & Handling) Rules, 2011	E-Waste (Management) Rules, 2016	Reasons /and Likely implications				
Target based approach for collection	under EPR					
No such Provision	Collection and channelisation of e-waste in Extended Producer Responsibility – Authorisation shall be in line with the targets prescribed in Schedule III of the Rules. The Phase wise Collection Target for e-waste, which can be either in number or weight shall be 30% of the quantity of waste generation as indicated in EPR Plan during first two year of implementation of rules followed by 40% during third and fourth years, 50% during fifth and sixth years and 70% during seventh year onwards.	Target based approach for implementation of EPR has been adopted on the basis of existing international best practices which indicate higher success rate for implementation of EPR in those countries having target based EPR Mechanism. Target based approach (Minimum) is being used in many countries like Japan (recycling rate 50% to 60%), South Korea (Recycling rate 55% to 70%), UK (Recycling and recovery rate 50% to 80%) and Netherlands (recycling rates 45% to 75%). As it may be noted in all these countries target is with reference to successful recycling rate whereas in India we have just began with adoption of successful collection rate to begin with. Further, the minimum target has been 455% internationally. Whereas, in India in order to gain experience the target has been kept as collection rate of 30% of the total e-waste generated as per the EPR plan submitted by Producer themselves. In order to ascertain the annual quantity of waste generated, category wise average life and the weight shall be used and this will be applied ton sales figure of the producers to arrive at the quantity of e-waste generation. All the details will be prescribed in the CPCB guidelines.

E-Waste (Management & Handling) Rules, 2011	E-Waste (Management) Rules, 2016	Reasons /and Likely implications		
Simplification of Permissions				
Authorization for collection centre, Dismantler and Recyclers to obtain Authorization and Registration, separately. Separate EPR authorization by all the states	·	Simplification of various permissions to avoid delays.		
Economic Instrument for implementati	on of the rules			
No specific citation	As optional financial mechanism for effective implementation of EPR			
E-Waste exchange	electrical and electronic equipment is returned;			
No specific citation	The e-waste exchange as an option has been provided in the rules.	The e-waste exchange as an option has been provided in the rules as an independent market instrument offering assistance or independent electronic systems offering services for sale and purchase of e-waste generated from end-of-life electrical and electronic equipment between agencies or organizations authorized under these rules		
Responsibilities of Manufacturer				
No Provision	To check the leakage to informal sector.

E-Waste (Management & Handling) Rules, 2011	E-Waste (Management) Rules, 2016	Reasons /and Likely implications						
Responsibilities of dealers								
No Provision	In the case the dealer has been given the responsibility of collection on behalf of the producer, the dealer shall collect the e-waste by providing the consumer a box	This will provide flexibility to producer for channelization and ensure ease of implementation by consumers for depositing the e-waste at end of life.						
	Dealer or retailer or e-retailer shall refund the amount as per take back system or Deposit Refund Scheme of the producer to the depositor of e-waste							
Responsibilities of the refurbisher								
No provision	Collect e-waste generated during the process refurbishing and channelise the waste authorised dismantler or recycler through it collection centre and seek one time authorization specification.							
Obligations for Bulk Consumer								
'bulk consumer means bulk users of electrical and electronic equipment such as Central Government or State Government Departments, public sector undertakings, banks, educational institutions, multinational organizations, international agencies, partnership and public or private companies that are registered under the Factories Act, 1948 (63 of 1948) and the Companies Act, 2013 (18 of 2013)	Bulk Consumer is being redefined by adding 'and health care facilities which have turnover of more than one crore or have more than twenty employees' They need to file annual returns.	To bring clarity in respect of definition and to put obligations on bulk consumers who are major generators and whose compliance was non satisfactory due to lack of any concrete obligation on reporting.						
No provision on annual return

E-Waste (Management & Handling) Rules, 2011	E-Waste (Management) Rules, 2016	Reasons /and Likely implications					
Responsibility of State Government							
No Provision	The roles of the State Government has been also introduced in the Rules in order to ensure safety, health and skill development of the workers involved in the dismantling and recycling operations. These responsibilities are as given below; (i) Department of Industry in State or any other government agency authorised in this regard by the State Government is to ensure earmarking or allocation of industrial space or shed for e-waste dismantling and recycling in the existing and upcoming industrial park, estate and industrial clusters; (ii) Department of Labour in the State or any other government agency authorised in this regard by the State Government need to ensure recognition and registration of workers involved in dismantling and recycling; assist formation of groups of such workers to facilitate setting up dismantling facilities; undertake Indusrial skill development activities for the workers involved in dismantling and recycling; and undertake annual monitoring and to ensure safety & health of workers involved in dismantling and recycling; (iii) State Government to prepare integrated plan for effective implementation of these provisions, and to submit annual report to Ministry of Environment, Forest and Climate Change.	Involvement of state government for effective implantation of the rules and simultaneously ensure welfare, safety and health of the workers involved in this e-waste management sector.
