Table of Contents

1. Background:	1
2. Methodology:	1
3. Analysis and Gaps:	2
4. Findings:	4
4.1. Import and Export of Hazardous Waste.....	8
4.2. Interstate Movement of Hazardous Waste	12
4.3. Recycling/Utilization of Hazardous Waste:.....	16
4.4. Disposal of Hazardous Waste:.....	22
4.5. Storage of Hazardous Waste	24
4.6. Details on Waste Collectors, Deposition Centres and Collection Centres.....	27
4.7. Management of Other Waste	27
5. Way Forward/Recommendations:	34
Annexure-I: Details of the Common TSDFs Available in the States/UTs.....	i
Annexure-II: Details of the Captive TSDFs Available in the States/UTs	vii
Annexure-III: State-District-Wise Details on Hazardous & Other Waste Generation and its Management of 33 SPCBs/PCCs	xiv
1. Andaman & Nicobar Islands	xv
2. Andhra Pradesh	xxiv
3. Assam	lix
4. Bihar	lxxii
5. Chandigarh.....	lxxxix
6. Chhattisgarh	xcviii
7. Delhi.....	cxxxi

1. Background:

The Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (HOWM Rules, 2016) stipulates provisions for maintaining records and filing annual returns pertaining to hazardous waste generation and their management by the occupiers/actual users/operator of the disposal facility. As per Rule 20(2) of the HOWM Rules, 2016, the occupier handling hazardous waste and operator of the disposal facility are required to submit the annual return (about hazardous wastes generation, storage, recycling, utilization, disposal, etc) in the prescribed Form to SPCB/PCC by 30th June of every financial year. Based on which, SPCBs/PCCs are required to prepare annual inventory of the waste generated, recycled, utilized, disposed, etc. for the respective State/UT and submit the same to CPCB by 30th September of every financial year in accordance with the provisions stipulated under Rule 20(3) of the HOWM Rules, 2016. And, as per Rule 20(4) of the HOWM Rules, 2016, CPCB is required to prepare consolidated report on management of hazardous and other wastes and submit the same to the Ministry of Environment, Forest and Climate Change before 30th December of every year.

2. Methodology:

CPCB has prepared guidelines for “Preparation of Inventories on Hazardous and Other Waste Generation and their Management” to enable SPCBs/PCCs in inventorisation of hazardous and other waste management. In the said guidelines, various formats have been prescribed to obtain information on annual inventory from SPCBs/PCCs.

These formats alongwith the guidelines were circulated to all SPCBs/PCCs vide letter dated 25/06/2019 for submitting information on or before 30th September 2019, so as to prepare national inventory on hazardous waste generation and its management.

Accordingly, this national inventory report on hazardous and other waste generation and its management has been prepared based on annual inventory received from SPCBs/PCCs for the financial year April 2018 – March 2019.

33 SPCBs/PCCs have submitted the annual inventory on hazardous waste generation and its management for the year 2018-19, however, 02 SPCB/PCCs (namely Arunachal Pradesh and DD&DNH) have not submitted the annual inventory report.

Further, except Chhattisgarh, Gujarat, Lakshadweep, Meghalaya, Odisha, Punjab, Rajasthan and Uttarakhand PCB, the remaining 25 SPCBs/PCCs have submitted the annual inventory within the stipulated time of 30th September, 2019.

This inventory report outlines state wise/district wise generation of hazardous

waste (i.e. landfillable, incinerable, recyclable and utilizable) their recycling, utilization, disposal and storage including details of hazardous and other waste imported and exported from/to other parts of the country along with details on interstate movement of hazardous waste within the country; availability of waste collection/deposition centres; recycling/utilization facilities and common/captive TSDFs.

3. Analysis and Gaps:

The annual inventory reports submitted by SPCBs/PCCs were examined by CPCB and following common gaps/issues have been observed in the annual inventories of the SPCBs/PCCs:

- a) Mismatch between the quantity of each type of hazardous waste (i.e. Landfillable/ Incinerable/Recyclable/ Utilizable) generated and its management in terms of disposal /recycled/utilized/co-processed and stored.
 - ❖ Reporting of quantity of hazardous waste managed (ranged from about 6000 MT to 5, 78,000 MT) more than the hazardous waste generated by 09 SPCBs (namely Andhra Pradesh, Gujarat, Haryana, Jammu & Kashmir, Kerala, Rajasthan, Telangana, Uttar Pradesh and West Bengal).
 - ❖ On the contrary, 09 SPCBs (namely Assam, Chhattisgarh, Jharkhand, Karnataka, Madhya Pradesh, Maharashtra, Odisha, Punjab and Tamil Nadu) reported quantity of hazardous waste managed (ranged from about 7800 MT to 2, 44, 000 MT) less than the quantity of hazardous waste generated.
- b) The quantity of hazardous wastes generated (as reported in annual return), is more than authorized quantity and vice-versa by some of the SPCBs/PCCs.
- c) Mismatch in the quantity of interstate movement of hazardous waste for recycling/utilization either by sender or receiver SPCB/PCC.
- d) Difference between the quantities of hazardous waste sent for recycling/co-processing/ utilization (as reported in Format A3) with the quantity reported in Format B.

Similarly, mismatch between the quantity of landfillable/incinerable hazardous wastes sent for disposal in common/captive TSDFs (as reported in Format A4) with the quantity of hazardous wastes received at the common TSDF (in Format D1 and D2 respectively).
- e) Mismatch between the details on numbers of recycler/utilizers/co-processors, their authorized capacity and quantity recycled/utilized/co-processed by them as reported in Format B with the detail list of such recycler/utilizers/co-processors provided in Format C.
- f) Mismatch among quantity of domestic HW and Fluorescent and other mercury containing lamps stored at the beginning of financial year at collection center, quantity disposed in TSDFs and the quantity stored at the end of financial year. (in Format A7-A and A7-B).

- g) Details on number & capacity of common and captive secured landfill facility and cumulative quantity disposed in the facilities have been not reported as per Format D1 and D2.

The above common gaps were communicated to respective SPCBs/PCCs for verification of data and submission of revised annual inventory. Out of 33 SPCBs/PCCs, 26 SPCBs/PCCs have submitted the revised inventory report, however, few gaps have not been resolved/clarified. Further, responses on the gaps have not been received from 07 SPCBs/PCCs (namely Andhra Pradesh, Haryana, Karnataka, Meghalaya, Punjab, Rajasthan and Telangana).

Therefore, CPCB couldn't finalize the National Inventory report in stipulated timelines. As outlined above, due to the aforesaid anomalies/gaps and non-submission of revised inventory from said SPCBs/PCCs, this national inventory report has following constraints:

- i. Hazardous waste generation and their management in Arunachal Pradesh and DD&DNH have not been incorporated in this report. However, for preparation of the annual inventory of 2018-19, the previous year inventory data (i.e. 2017-18) provided by DD&DNH (in terms of number of units and authorized quantity) has been incorporated in this report.
- ii. Most of the SPCBs/PCCs have reported that all the occupiers available in their State/UT have not submitted the annual returns.
- iii. Except revised inventory report of Puducherry, Sikkim, Nagaland, gaps have been observed in the verified/updated inventory received from remaining 30 SPCBs/PCCs.
- iv. Reporting of combined quantity of landfillable, incinerable, recyclable and utilizable hazardous waste stored at occupier's premises at the beginning and end of financial year by Gujarat PCB.
- v. Non-verified data with regard to interstate movement of hazardous waste for recycling/utilization/disposal by most of the SPCBs/PCCs, which resulted into difficulty in reporting of data at national level including accounting of hazardous waste generation and its management.
- vi. Quantity of Domestic HW and Fluorescent and other mercury containing lamps, stored at the beginning and end of financial year have not been reported by SPCBs of Andhra Pradesh, Himachal Pradesh and Karnataka.
- vii. Details on type/category of hazardous waste imported/exported were not provided by most of the SPCBs/PCCs, where import and export of hazardous waste has been reported.

- viii. Kerala PCB has not provided details on authorized capacity of collection centres and management of hazardous waste received. Further, PCBs of Himachal Pradesh and Maharashtra have not provided the capacity of the waste deposition centers.

4. Findings:

There are 69,416 numbers of hazardous waste generating industries, authorized to generate 40.44 Million MT of hazardous waste. Whereas, based on annual returns submitted by the occupiers about 8.64 Million MT of hazardous waste was generated during 2018-19. The State/UT wise details on hazardous waste generation are given in **Table I**.

Out of 8.64 Million MT quantity of generated hazardous waste, about 2.48 million MT is landfillable hazardous waste (28.65 % of total generation); 0.34 Million MT is incinerable hazardous waste (3.91 % of total generation); 1.52 Million MT is recyclable (17.60 % of total generation) and 4.31 Million MT is utilizable hazardous waste (49.84 % of total generation). The same is depicted in **Figure 1** below:

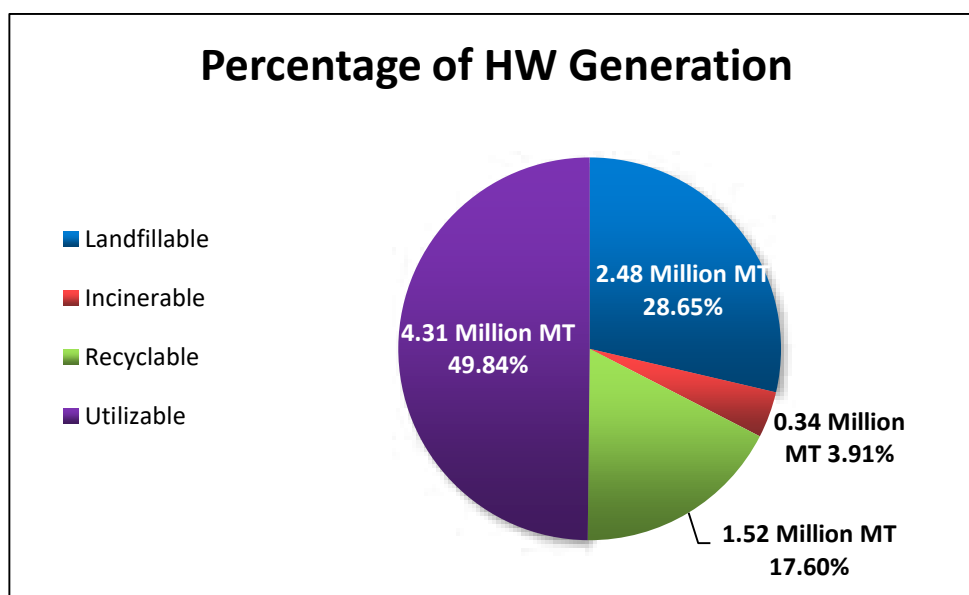

Figure 1: Percentage of Hazardous Waste Generated

Top 11 hazardous waste generating states are Gujarat (29.19%), Maharashtra (12.77%), Tamil Nadu (10.76%), Odisha (7.97%), Rajasthan (6.51%), Andhra Pradesh (5.97%), Jharkhand (5.32%), Karnataka (4.20%), Telangana (4.08%), Uttar Pradesh (2.84%) and Madhya Pradesh (2.11%) which together contributes about 91.71% of total hazardous waste generated. State-wise status of hazardous waste generation is also presented in **Figure 2**.

\$ Data pertains to 2017-18, as DD&DNH PCC has not submitted annual inventory report of 2018-19.

Figure 2: State-wise Status of Hazardous Waste Generation in the Country (MT)

Further, at the beginning of financial year (i.e. 1st April, 2018) about 1.86 Million MT of hazardous waste was stored at occupiers' premises; 0.20 Million MT of hazardous waste was imported and about 8.64 Million MT hazardous waste generated during the year (2018-19), thus, the total quantity of hazardous waste required to be managed during 2018-19 is 10.70 Million MT. Out of which about 3.38 Million MT hazardous waste (32%) has been disposed through common and captive TSDFs, about 4.18 Million MT has been recycled/utilized (45%) and about 2.72 Million MT has been stored at occupier's premises at the end of financial year. The same has been summarized in **Table II** below:

	(iv) Non-captive utilization (other than (ii) above) under Rule 9 of the HOWM Rules, 2016	:	1.25
6.	Quantity of hazardous waste stored at occupiers' s premises at the end of financial year	:	2.72 Million MT

State- wise/ District-wise details on generation and management of hazardous and other waste for 33 States/UTs are given at **Annexure-III**.

4.1. Import and Export of Hazardous Waste

The Ministry of Environment, Forest and Climate Change is the nodal Ministry to deal with the transboundary movement of the hazardous and other wastes in accordance to the provisions laid down under the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016.

Hazardous and other wastes specified in Part A and Part B of Schedule III of the HOWM Rules, 2016 are required to be imported or exported by actual users in accordance with the provisions laid down under HOWM Rules, 2016. Based on information provided by SPCBs/PCCs it was observed that only 10 States/UTs namely Andhra Pradesh, Haryana, Himachal Pradesh, Karnataka, Madhya Pradesh, Maharashtra, Punjab, Rajasthan, Tamil Nadu and West Bengal, are involved in the Import and Export of Hazardous waste. State-wise details on quantity of hazardous waste imported and exported are given in **Table III**.

Of 2,08,346 MT imported hazardous waste, about 77.06% (160551 MT) of hazardous waste has been recycled, 7.13% (14849 MT) has been utilized based on CPCB's SoPs under Rule 9, about 0.29% (594 MT) has been co-processed in cement plants and remaining 32352 MT has been stored at occupiers' premises at the end of financial year.

State-wise status on quantity imported-exported and their management are given below in **Table III**.

4.2. Interstate Movement of Hazardous Waste

About 1.40 Million MT of hazardous waste has been reported to either sent or received by/from the States/UTs for the purpose of recycling/utilization/disposal. Of the 1.40 Million MT of interstate movement of hazardous waste, about 2,284 MT for disposal in common secured landfill; 12,926 MT for incineration at common incinerator; 1,64,461 MT for recycling; 11,28,937 MT for co-processing and 98,957 MT for utilization (other than co-processing).

It was observed that maximum quantity of hazardous waste involved in interstate movement for the purpose of recycling and utilization compared to disposal. Further, states which do not have common disposal facilities such as Bihar, Chhattisgarh, Chandigarh, Puducherry and Tripura have sent their landfillable hazardous waste to other states for disposal into common secured landfills. Whereas, Delhi, Goa, Jammu & Kashmir, Sikkim, Rajasthan, Punjab, Tripura, Puducherry and Chandigarh have sent their incinerable hazardous waste to other states for incineration through common incinerator.

State-wise details of the interstate movement of landfillable, incinerable, recyclable and utilizable hazardous waste are given in **Table IV**.

4.3. Recycling/Utilization of Hazardous Waste:

There are 2,111 authorized recyclers for recycling of hazardous waste (listed under Schedule IV of the HOWM Rules, 2016) having authorized capacity of 7.97 Million MT. About 1.30 Million MT of hazardous waste has been recycled during 2018-19.

Out of 2,111 recyclers, around 702 are lead bearing waste recyclers, 592 used & waste oil recyclers, 217 zinc bearing waste recyclers, 231 brass bearing waste recyclers, 188 E-waste recyclers, 114 copper bearing waste recyclers, 42 spent catalysts, 14 paint & ink sludge, etc.

There are 89 cement plants authorized for co-processing of hazardous wastes having authorized capacity of 15.19 Million MT and about 1.38 Million MT of hazardous waste has been utilized during 2018-19.

Apart from utilization of hazardous waste in cement plant, there are 525 authorized utilizers (utilizing hazardous waste as per the SOPs prepared by CPCB under Rule 9), having authorized capacity of 3.99 Million MT. During 2018-19, about 1.25 Million MT hazardous waste have been utilized by these utilizers.

Hazardous waste generated can also be utilized within the premises as a captive utilization, during 2018-19, about 0.88 Million MT of hazardous waste has been utilized as captive utilization, of which about 40% by Tamil Nadu, 22.83% by Andhra Pradesh, 21.57% by Odisha, 5.90% by Madhya Pradesh, 4.55% by Uttar Pradesh.

State-wise details on numbers, authorized capacity and quantity of hazardous waste recycled/co-processed/utilized including captive utilization given below in **Table-V**.

4.4. Disposal of Hazardous Waste:

There are 45 Common Hazardous Waste Treatment, Storage and Disposal Facilities (TSDFs) in 18 States/UT. Of which, 17 are integrated TSDFs (having both Secured Landfills and Incinerators); 12 are standalone incinerators, and 16 are Secured Landfills only.

During 2018-19, about 2.28 Million MT of landfillable hazardous waste has been disposed in common secured landfills and 0.18 Million MT disposed through common incineration. Details of the Common TSDFs available in the States/UT are provided at **Annexure-I**.

Apart from common disposal facility, there are 131 captive disposal facilities. Of which 09 are captive integrated facilities (having both SLF and incinerator); 82 are captive incinerators and 40 are captive secured landfills available in 18 States/UTs. Details of the Captive TSDFs available in the States/UTs are provided at **Annexure-II**.

About 0.78 Million MT of landfillable hazardous waste and 0.13 Million MT of incinerable hazardous waste has been disposed in captive TSDFs during 2018-19. State/UT wise availability of common & captive facilities and quantity of hazardous waste disposed in same is given below in **Table VI & VII**.

Fluorescent and other mercury containing lamps covered under the E-Waste Management Rules, 2016, may be disposed in TSDF in case of no recycling facility available in the State/UT. In this regard, Andhra Pradesh; Himachal Pradesh; Karnataka; Kerala; Uttarakhand and West Bengal have reported that about 13,624 MT of fluorescent and other mercury containing lamps has been disposed in common TSDF available in their states. The details of the same have been provided in **Annexure-III**.

4.5. Storage of Hazardous Waste

About 1.86 Million MT of hazardous waste has been reported to be stored at occupier's premises at the beginning of financial year i.e. 1st April, 2018 and about 2.72 Million MT at the end of financial year i.e. 31st March, 2019.

Further, Gujarat has provided combined quantity of hazardous waste (landfillable, incinerable, recyclable and utilizable) stored at beginning and/or end of financial year.

State-wise quantity of hazardous stored at occupiers' premises is given at **Table VIII**.

4.6. Details on Waste Collectors, Deposition Centres and Collection Centres

Waste collectors are persons who collect hazardous or other wastes on behalf of actual user or operator of disposal facility from the occupier as defined under the HOWM Rules, 2016.

There are 19 waste collectors in state of Bihar (01), Goa (02), Haryana (01), Himachal Pradesh (04), Kerala (02), Punjab (07), Tamil Nadu (01) and West Bengal (01), with authorized capacity of 0.23 Million MT. About 55,568 MT of waste (Hazardous and Other Waste) has been received at these centers during the financial year 2018-19. About 47,394 MT of hazardous and other waste have been sent to TSDF for disposal and about 2,799 MT stored at occupier's premises at the end of financial year. The details of the same are given in **Table IX**.

Solid Waste Management Rules, 2016, defines discarded paint drums, pesticide cans, CFL bulbs, tube lights, expired medicines, broken mercury thermometers, used batteries, used needles and syringes and contaminated gauge, etc., generated at the household level as a "domestic hazardous waste" and 'Waste Deposition Centers' are required to be established for collection of domestic hazardous waste and transportation of the same for safe disposal.

There are 54 deposition centers (53 in Maharashtra and 01 in Himachal Pradesh) in the country wherein, about 852 MT of domestic hazardous waste has been received and stored. The authorized capacity of said deposition centres have not been provided by either of the SPCBs. The details of the deposition centers are given in **Table X**.

Further, the Fluorescent and other mercury containing lamps as defined in the E-Waste Management Rules, 2016, that are channelized through collection centres to common TSDFs be considered as Hazardous Waste.

There are 15 collection centers for collection of Fluorescent and Other Mercury containing lamps in Karnataka (01), Kerala (01), Maharashtra (12) and West Bengal (01). Further, Himachal Pradesh has reported the quantity of Fluorescent and Other Mercury containing lamps sent to common TSDF, however, the numbers of collection centres have not been provided. The said collection centers have an authorized capacity of 180390 MT and during the financial year 2018-19, about 13596 MT of HW has been disposed in common TSDFs. The details of collection centres are given in **Table XI**.

4.7. Management of Other Waste

"Other Wastes" has been defined under Rule 3(1) (23) of HOWM Rules, 2016, as wastes specified in Part B and Part D of Schedule III for import or export and includes all such

waste generated indigenously within the county.

There are 77 and 156 authorized units for recycling/utilization of other waste listed under Schedule III- Part B and Schedule III- Part D, respectively of HOWM Rules, 2016, having authorized capacity of 1.42 Million MT and 2.11 Million MT respectively.

During the year, about 1.51 Million MT of other waste has been recycled/utilized, of which, 0.70 Million MT of other waste has been imported.

Further, about 0.09 Million MT other waste has been sent to common TSDF for disposal and 77645 MT other waste stored at occupier's premises at the end of financial year,

Only Madhya Pradesh PCB has reported about export of 4536 MT of other waste.

State-wise details on other waste recycler, quantity imported and their management are given in **Table XII**.

SPCBs/PCCs have not provided revised inventory.

^ Imports Other Waste only for trading.

5. Way Forward/Recommendations:

1. SPCBs/PCCs shall ensure submission of annual returns by all occupiers within the stipulated time period i.e. 30th June of every year.
2. Cross verification of annual returns submitted by occupiers before finalization of annual inventory. Further, SPCBs/PCCs may devise its own mechanism for preparing their annual inventory with suitable technology interventions ensuring that their State/UT's annual inventory is reliable and credible
3. Verification and reconciliation of manifest document by SPCBs/PCCs w.r.t movement of hazardous and other waste within and outside State/UT.
4. Submission of compiled annual inventory report by all SPCBs/PCCs within the stipulated time period i.e. 30th September of every year.
5. About 32% of hazardous waste has been disposed through incineration or secured landfilling. However, there is a possibility that this fraction of hazardous waste going may have potential for utilization. Therefore, it shall be endeavor of waste generators and SPCBs/PCCs to explore further opportunities of recycling/utilizing wastes rather than to dispose in secured landfilling/incineration so as to achieve higher recycling/utilization in accordance with provisions stipulated under the HOWM Rules, 2016

Note: UT of Lakshadweep is non industrial area. The HW like used oil (Waste oil) generated from the automobiles workshops and diesel generators from power house running through the department of electricity for the generation of power supply to the people. The no. of automobile workshop in the UT is 35 and Power house is 11.
